KEY INFORMATION MEMORANDUM

LIC MF Technology Fund

(An open-ended equity scheme investing in technology & technology-related companies)

This product is suitable for investors who are seeking*:	Scheme Riskometer#	Benchmark Riskometer (as applicable) #
• Capital appreciation over long term • Investment in equity and equity related instruments of technology and technology related companies.	 The risk of the scheme is Very High	As per AMFI Tier 1 Benchmark Riskometer i.e. **BSE TECk (TRI)**  The risk of the benchmark is very high

*Investors should consult their financial advisers if in doubt about whether the product is suitable for them.

#The above product labelling assigned during the New Fund Offer (NFO) is based on internal assessment of the scheme characteristics or model portfolio and the same may vary post NFO when the actual investments are made. The Riskometer of the Benchmark is on 31st January 2026.

Offer for Units of Rs.10 each for cash during the New Fund Offer Period and at NAV based prices upon re-opening

New Fund Offer Opens on: 20th February 2026
New Fund Offer Closes on: 6th March 2026
Scheme re-opens on: 19th March 2026

Name of the Sponsor	: Life Insurance Corporation of India (LIC)
Name of Mutual Fund	: LIC Mutual Fund
Name of Asset Management Company	: LIC Mutual Fund Asset Management Limited
Name of Trustee Company	: LIC Mutual Fund Trustee Private Limited

This Key Information Memorandum (KIM) sets forth the information, which a prospective investor ought to know before investing. For further details of the scheme/Mutual Fund, due diligence certificate by the AMC, Key Personnel, investors' rights & services, risk factors, penalties & pending litigations etc. investors should, before investment, refer to the Scheme Information Document and Statement of Additional Information available free of cost at any of the Investor Service Centres or distributors or from the website www.licmf.com.

The Scheme particulars have been prepared in accordance with Securities and Exchange Board of India (Mutual Funds) Regulations 1996, as amended till date, and filed with Securities and Exchange Board of India (SEBI). The units being offered for public subscription have not been approved or disapproved by SEBI, nor has SEBI certified the accuracy or adequacy of this KIM.

This Key Information Memorandum is dated 11th **February 2026**

<table>
<tr><td>Investment Objective</td><td>The investment objective of the Scheme is to achieve long term capital appreciation by predominantly investing in equity and equity related instruments of technology & technology-related companies.

There is no assurance that the investment objective of the Scheme will be achieved.</td></tr>
<tr><td>Asset Allocation Pattern of the scheme</td><td>Under normal circumstances, the asset allocation of the Scheme would be as follows:
<table>
<tr><th rowspan="2">Instruments</th><th colspan="2">Indicative allocations(% of total assets)</th></tr>
<tr><th>Minimum</th><th>Maximum</th></tr>
<tr><td>Equity and Equity related instruments of technology and technology related companies</td><td>80</td><td>100</td></tr>
<tr><td>Equity and Equity related instruments of other than above companies</td><td>0</td><td>20</td></tr>
<tr><td>Debt and Money market instruments</td><td>0</td><td>20</td></tr>
<tr><td>Units issued by Infrastructure Investment Trusts (InvITs)</td><td>0</td><td>10</td></tr>
</table>
The Cumulative gross exposure through equity, debt, derivatives positions, Infrastructure Investment Trusts (InvITs), Repo in Corporate Debt Securities and other permitted securities/assets and such other securities/assets as may be permitted by SEBI from time to time will not exceed 100% of the net assets of the Scheme in accordance with paragraph 12.24 of SEBI Master Circular for Mutual Funds.

Cash or cash equivalents with residual maturity of less than 91 days may be treated as not creating any exposure. SEBI vide letter dated 3rd November 2021 has clarified that Cash Equivalent shall consist of Government Securities, T-Bills and Repo on Government Securities having residual maturity of less than 91 days.

<u>Indicative Table</u>
<table>

	be permitted from time to time)		
3.	Securitized Debt	0%	-
4.	Overseas Securities, ADRs/GDRs	0%	-
5.	InVITs	The mutual fund under all its schemes shall not own more than 10% of units issued by a single issuer of InvITs. The Scheme shall invest not more than: • 10% of its NAV in the units of InvITs; and • 5% of its NAV in the units of InvITs issued by a single issuer	Clause 13 of seventh Schedule of SEBI (Mutual Funds) Regulations, 1996 read with Paragraph 12.21 of SEBI Master Circular for Mutual Funds
6.	AT1 and AT2 Bonds	The Scheme may invest not more than: • 10% of its NAV of the debt portfolio of the scheme in such instruments; and • 5% of its NAV of the debt portfolio of the scheme in such instruments issued by a single issuer.	Paragraph 12.2 of SEBI Master Circular for Mutual Funds
7.	**Any other instrument**		
	Triparty Repo (TREPS)	As per the asset allocation pattern	-
	Mutual Fund units	The Scheme may invest in another scheme (except fund of funds Schemes) under the AMC or any other mutual fund without charging any fees, provided that the aggregate inter-scheme investment made by all Schemes under the same management or in Schemes under the management of any other asset management company shall not exceed 5% of the Net Asset Value of the Mutual Fund.	Clause 4 of Seventh Schedule of SEBI (Mutual Funds) Regulations, 1996
	Repo/ Reverse Repo transactions in corporate debt securities	The gross exposure to repo transactions in corporate debt securities shall not be more than 10% of the net assets of the Scheme. Further, the amount lent to counter-party under repo	Paragraph 12.18 of SEBI Master Circular for Mutual Funds.

			transaction in corporate debt securities will be included in single issuer debt instrument limit.	
		Short Term Deposits of Scheduled Commercial Banks – pending deployment	The Scheme shall park not more than 15% of their net assets in short-term deposits of all scheduled commercial banks put together. This limit, however, may be raised to 20% with prior approval of the Trustees. Further, the parking of funds in short term deposits of associate and sponsor scheduled commercial banks together shall not exceed 20% of the total deployment by the Mutual Fund in short term deposits. The Scheme shall park not more than 10% of the net assets in short term deposits with any one scheduled commercial bank including its subsidiaries.	Paragraph 12.16 of SEBI Master Circular for Mutual Funds.
		Debt Instruments with Structured Obligations / Credit Enhancement	0%	-
		Covered call option	The Scheme may write call options only under a covered call strategy for constituent stocks of NIFTY 50 and BSE SENSEX, and any other stock as and when allowed by SEBI, subject to the following: A) The total notional value (taking into account strike price as well as premium value) of call options written by a scheme shall not exceed 15% of the total market value of equity shares held in that scheme. B) The total number of shares underlying the call options written shall not exceed 30% of the unencumbered shares of a particular company held in the scheme. The unencumbered shares in a scheme shall mean shares	Paragraph 12.25.8 of SEBI Master Circular for Mutual Funds

		that are not part of Securities Lending and Borrowing Mechanism (SLBM), margin or any other kind of encumbrances	
	Credit Default Swaps	0%	–

The Scheme does not intend to invest in the following instruments:

Sr. No.	Type of the Instruments
1.	Overseas Securities, ADRs/GDRs
2.	Debt Instruments with Structured Obligations / Credit Enhancement
3.	Credit Default Swaps
4.	Debt/ Fixed Income Derivatives
5.	Unrated Debt instruments
6.	Securitized Debt

Portfolio rebalancing due to passive breaches:

As per Paragraph 2.9 of SEBI Master Circular for Mutual Funds, in the event of any deviation from the mandated asset allocation due to passive breaches (occurrence of instances not arising out of omission and commission of the AMC), the Investment Manager shall rebalance the portfolio within 30 business days from the date of said deviation. Where the portfolio is not rebalanced within 30 business days, justification in writing including details of efforts taken to rebalance the portfolio shall be placed before the Investment Committee. The Investment Committee, if so desires, can extend the timelines up to 60 business days from the date of completion of mandated rebalancing period. In case the portfolio of the scheme is not rebalanced within the aforementioned mandated plus extended timelines, AMC shall not be permitted to launch any new scheme till the time the portfolio is rebalanced. The AMC shall not levy exit load, if any, on the investors exiting such scheme. The AMC will comply with the reporting and disclosure requirements as stated in Paragraph 2.9 of SEBI Master Circular for Mutual Funds, and other applicable guidelines and circulars issued from time to time.

Short Term Defensive Consideration:

As per Paragraph 1.14.1.2 of SEBI Master Circular for Mutual Funds, the asset allocation pattern given above may be altered by the Investment Manager for a short-term period on defensive considerations. In the event of any deviations, the Investment Manager shall rebalance the portfolio within 30 calendar days from the date of said deviation.

Timelines for deployment of Funds mobilized in a New Fund Offer (NFO) as per asset allocation of the scheme:

In terms of SEBI Circular dated 27th February 2025, AMC shall deploy the funds garnered in an NFO within 30 business days from the date of allotment of units. In an exceptional case, if the AMC is not able to deploy the funds in 30 business days, reasons in writing, including details of efforts taken to deploy the funds, shall be placed before the Investment Committee of the AMC. The Investment Committee may extend the timeline by 30 business days, while also making recommendations on how to ensure deployment within 30 business days going forward and monitoring the same. The Investment Committee shall examine the root cause of the delay in deployment before

	granting approval for part or full extension. The Investment Committee shall not ordinarily give part or full extension where the assets for any scheme are liquid and readily available. Trustees shall monitor the deployment of funds collected in NFO and take steps, as may be required, to ensure that the funds are deployed within a reasonable timeframe. The Mutual Fund/AMC shall make investment out of the NFO proceeds only on or after the closure of the NFO period. The Mutual Fund/ AMC can however deploy the NFO proceeds in Tri-Party Repo before the closure of NFO period. However, AMCs shall not charge any investment management and advisory fees on funds deployed in Tri-party Repo during the NFO period. The appreciation received from investment in Tri-Party Repo shall be passed on to investors.
Investment Strategy	The objective of the Scheme is to achieve long term capital appreciation by predominantly investing in equity and equity related instruments of technology & technology-related companies. Further, the Scheme shall follow an active investment strategy. India is undergoing a rapid digital transformation, driven by technology adoption across businesses and consumers. Factors such as increasing internet penetration, smartphone usage, cloud migration, automation, and the rise of e-commerce and fintech are reshaping the economic landscape. Technology is no longer a standalone sector; it is becoming the backbone of every industry, enabling efficiency, scalability, and innovation. Over the past decade, technology and digital platforms have evolved from being support functions to becoming core drivers of growth. Businesses are leveraging data, artificial intelligence, and automation to enhance productivity and customer experience. Consumers, on the other hand, are embracing digital services for shopping, payments, entertainment, and communication. This structural shift is creating long-term opportunities for companies that build, enable, or benefit from technology and digitization. This investment strategy aims to capture these opportunities by investing predominantly in equity and equity-related securities of companies which are a part of Technology, Internet and Digital, Data Centers and ancillary and E-commerce/Q-commerce (T.I.D.E.). The Schema will allocate 80-100% of the portfolio to such businesses, while retaining flexibility to invest up to 20% of the scheme's assets outside the primary technology theme. Portfolio construction will be market-cap agnostic, combining bottom-up stock selection (based on quality, growth prospects, management strength, and valuations) with top-down thematic views on digital adoption and technology cycles. The emphasis will be on companies with robust business models, strong competitive positions, and high governance standards. Indicative Investment Universe The Scheme will invest across businesses that are part of or benefit from technology and digitization, including but not limited to: • IT Services, Consulting & Outsourcing • Software & Platforms (SaaS (Software as a Service), PaaS (Platform as a Service), DaaS (Desktop/Data as a Service) and DBaaS (Database as a Service)) • IT Products & Hardware; Semiconductors; Electronics & Components • Internet Companies; E-Commerce; Consumer Tech; Fintech; Digital Service Providers; IoT

- Telecom Services & Equipment; Networking; Digital Infrastructure & Data Centers
- Media & Information Services; Data Analytics; Automation; AI; Cloud Computing; Robotics
- Consumer Services where technology is an integral part.
- Any other industry/sector that forms part of the benchmark index.

Please note: The above list is indicative. The Fund Manager may add other businesses that fall within the Technology sector or benefit from digitization.

Portfolio Construction & Selection

- Research Framework: Rigorous fundamental analysis of management quality, business competitiveness, governance, growth prospects, track record, and valuations.
- Thematic Filters: Focus on companies driving or benefiting from digital transformation.
- Market Cap Allocation: Market-cap agnostic—exposure across large-cap, mid-cap, and small-cap companies to capture growth opportunities at different stages.

Further, for determining list of the companies eligible under technology theme the AMC will consider the basic Industry list published by BSE Indices for BSE TECk Index. Please refer link
https://www.bseindices.com/indices-details/code/43/" for current index methodology document published by BSE Indices.

The Scheme will invest across market capitalization. The portfolio will be built utilising a combination of top-down and bottom-up stock selection process supported by in-house research. Essentially, the focus would be on fundamentally strong companies with scope for growth over time. The AMC, in selecting the scrips, would focus on the fundamentals of the business, the industry structure, the quality of management sensitivity to economic factors, the financial strength of the company and the key earning drivers.

Investment in Equity Derivatives

The Fund's trading in derivatives would be in line that is permitted by SEBI Regulations from time to time. The Scheme may use various derivatives and hedging products/ techniques, in order to seek to generate better returns for the Scheme. Derivatives are financial contracts of pre-determined fixed duration, whose values are derived from the value of an underlying primary financial instrument, commodity or index. The Scheme while investing in equities shall transact in exchange traded equity derivatives only and these instruments may take the form of Index Futures, Index Options, Futures and Options on individual equities/securities and such other derivative instruments as may be appropriate and permitted under the SEBI Regulations and guidelines from time to time.

Advantages of Trading in Derivatives

Advantages of derivatives are many. The use of derivatives provides flexibility to the Schemes to hedge whole or part of the portfolio. The following section describes some of the more common derivatives transactions along with their benefits.

Derivatives are financial contracts of pre-determined fixed duration, whose values are derived from the value of an underlying primary financial instrument, commodity or index, such as interest rates, exchange rates, commodities and equities.

Futures

A futures contract is a standardized contract between two parties where one of the parties commits to sell, and the other to buy, a stipulated quantity of a security at an agreed price on or before a given date in future.

Currently, futures contracts have a maximum expiration cycle of 3 months. Three contracts are available for trading, with 1 month, 2 months and 3 months expiry respectively. A new contract is introduced on the next trading day following the expiry of the relevant monthly contract. Futures contracts typically expire on the last Thursday of the month. For example, a contract with the March 2018 expiration expires on the last Thursday of March 2018 (March 29, 2018).

Basic Structure of an Index Future

The Stock Index futures are instruments designed to give exposure to the equity markets indices. The Stock Exchange, Mumbai (BSE) and The National Stock Exchange (NSE) have trading in index futures of 1, 2 and 3 month maturities. The pricing of an index future is the function of the underlying index and short-term interest rates. Index futures are cash settled, there is no delivery of the underlying stocks.

Example using hypothetical figures: 1 month ABC Index Future

If the Scheme buys 2,000 futures contracts, each contract value is 50 times the futures index price.

Purchase Date	:	March 01, 2022
Spot Index	:	10,200.00
Future Price	:	10,300.00
Date of Expiry	:	March 28, 2022
Margin	:	10%

Assuming the exchange imposes a total margin of 10%, the Investment Manager will be required to provide a total margin of approx. Rs. 103,000,000 (i.e. 10%*10300*2000*50) through eligible securities and cash.

Assuming on the date of expiry, i.e. March 28, 2022, ABC Index closes at 10,350, the net impact will be a profit of Rs. 5,000,000 for the Scheme, i.e. (10,350-10,300) * 2000 * 50 (Futures price = Closing spot price = Rs. 10,350.00)

Profits for the Scheme = (10,350-10,300) * 2000*50 = Rs. 5,000,000.

Please note that the above example is given for illustration purposes only. Some assumptions have been made for the sake of simplicity.

The net impact for the Scheme will be in terms of the difference of the closing price of the index and cost price. Thus, it is clear from the above example that the profit or loss for the Scheme will be the difference between the closing price (which can be higher or lower than the purchase price) and the purchase price. The risks associated with index futures are similar to those associated with equity investments. Additional risks could be on account of illiquidity and potential mis-pricing of the futures.

Basic Structure of a Stock Future

A futures contract on a stock gives its owner the right and obligation to buy or sell stocks. Single Stock Futures traded on NSE (National Stock Exchange) are cash settled, there is no delivery of the underlying stocks on the expiration date. A purchase or sale of futures on a security gives the trader essentially the same price exposure as

	a purchase or sale of the security itself. In this regard, trading stock futures is no different from trading the security itself. Example using hypothetical figures: The Scheme holds shares of ABC Ltd., the current price of which is Rs. 500 per share. The Scheme sells one month futures on the shares of ABC Ltd. at the rate of Rs. 540. If the price of the stock falls, the Mutual Fund will suffer losses on the stock position held. However, in such a scenario, there will be a profit on the short futures position. At the end of the period, the price of the stock falls to Rs. 450 and this fall in the price of the stock results in a fall in the price of futures to Rs. 470. There will be a loss of Rs. 50 per share (Rs. 500 - Rs. 450) on the holding of the stock, which will be offset by the profits of Rs. 70 (Rs. 540 - Rs. 470) made on the short futures position. Please note that the above example is given for illustration purposes only. Some assumptions have been made for the sake of simplicity. Certain factors like margins and other related costs have been ignored. The risks associated with stock futures are similar to those associated with equity investments. Additional risks could be on account of illiquidity and potential mis-pricing of the futures. **Options** An option gives a person the right but not an obligation to buy or sell something. An option is a contract between two parties wherein the buyer receives a privilege for which he pays a fee (premium) and the seller accepts an obligation for which he receives a fee. The premium is the price negotiated and set when the option is bought or sold. A person who buys an option is said to be long in the option. A person who sells (or writes) an option is said to be short in the option. An option contract may be of two kinds: **a) Call option** An option that provides the buyer the right to buy is a call option. The buyer of the call option can call upon the seller of the option and buy from him the underlying asset at the agreed price. The seller of the option has to fulfil the obligation upon exercise of the option. **b) Put option** The right to sell is called a put option. Here, the buyer of the option can exercise his right to sell the underlying asset to the seller of the option at the agreed price. Option contracts are classified into two styles: **(a) European Style** In a European option, the holder of the option can only exercise his right on the date of expiration only. **(b) American Style** In an American option, the holder can exercise his right anytime between the purchase date and the expiration date. Basic Structure of an Equity Option

In India, options contracts on indices are European style and cash settled whereas, option contracts on individual securities are American style and cash settled.

Example using hypothetical figures: Market type : N Instrument Type : OPTSTK
Underlying : ABC Ltd.(ABC) Purchase date : March 1, 2022
Expiry date : March 20, 2022
Option Type : Put Option (Purchased) Strike Price : Rs. 8,750.00
Spot Price : Rs. 8,800.00
Premium : Rs. 200.00
Lot Size : 100
No. of Contracts : 50
Say, the Mutual Fund purchases on March 1, 2022, 1 month Put Options on ABC Ltd. (ABC) on the NSE i.e. put options on 5000 shares (50 contracts of 100 shares each) of ABC.

As these are American style options, they can be exercised on or before the exercise date i.e. March 20, 2022. If the share price of ABC Ltd. falls to Rs. 8,500/- on March 20, 2022, and the Investment Manager decides to exercise the option, the net impact will be as Follows:
Premium Expense = Rs. 200 * 50 * 100 =Rs. 10,00,000/-
Option Exercised at = Rs. 8,500/-

Profits for the Mutual Fund = (8,750.00 - 8,500.00) * 50 * 100=Rs. 12,50,000/-
Net Profit = Rs. 12,50,000 - Rs. 10,00,000 = Rs. 2,50,000/-

In the above example, the Investment Manager hedged the market risk on 5000 shares of ABC Ltd. by purchasing put options.

Please note that the above example is given for illustration purposes only. Some assumptions have been made for the sake of simplicity. Certain factors like margins have been ignored. The purchase of Put Options does not increase the market risk in the Mutual Fund as the risk is already in the Mutual Fund's portfolio on account of the underlying asset position (in his example shares of ABC Ltd.). The Premium paid for the option is treated as an expense and added to the holding cost of the relevant security. Additional risks could be on account of illiquidity and potential mis-pricing of the options.

Presently, the position limits for trading in derivatives by Mutual Fund specified under Paragraph 7.5 of SEBI Master Circular for Mutual Funds are as follows:

Position Limits
The position limits for Mutual Funds and its schemes shall be under:
(SEBI Circular No. SEBI/HO/MRD/MRD-PoD-2/P/CIR/2024/140 dated October 15, 2024 as amended from time to time are as follows)

i) Position limit for Mutual Funds in index options contracts
a) The Mutual Fund position limit in all index options contracts on a particular underlying index shall be INR 500 crore or 15% of the total open interest of the market in index options, whichever is higher, per Stock Exchange.
b) This limit would be applicable on open positions in all options contracts on a particular underlying index.

	(ii) Position limit for Mutual Funds in index futures contracts a) The Mutual Fund position limit in all index futures contracts on a particular underlying index shall be INR 500 crore or 15% of the total open interest of the market in index futures, whichever is higher, per Stock Exchange. b) This limit would be applicable on open positions in all futures contracts on a particular underlying index. **(iii) Additional position limit for hedging** In addition to the position limits at point (i) and (ii) above, Mutual Funds may take exposure in equity index derivatives subject to the following limits: 1. Short positions in index derivatives (short futures, short calls and long puts) shall not exceed (in notional value) the Mutual Fund's holding of stocks. 2. Long positions in index derivatives (long futures, long calls and short puts) shall not exceed (in notional value) the Mutual Fund's holding of cash, government securities, T-Bills and similar instruments. **(iv) Position limit for Mutual Funds for stock based derivative contracts** The Mutual Fund position limit in a derivative contract on a particular underlying stock, i.e. stock option contracts and stock futures contracts will be as follows :- - The combined futures and options position limit shall be 20% of the applicable Market Wide Position Limit (MWPL). **(v) Position limit for each scheme of a Mutual Fund** The scheme-wise position limit requirements shall be: a) For stock option and stock futures contracts, the gross open position across all derivative contracts on a particular underlying stock of a scheme of a mutual fund shall not exceed the higher of: 1. 1% of the free float market capitalization (in terms of number of shares). Or 2. 5% of the open interest in the derivative contracts on a particular underlying stock (in terms of number of contracts). b) This position limits shall be applicable on the combined position in all derivative contracts on an underlying stock at a Stock Exchange. c) For index based contracts, Mutual Funds shall disclose the total open interest held by its scheme or all schemes put together in a particular underlying index, if such open interest equals to or exceeds 15% of the open interest of all derivative contracts on that underlying index. Further, the exposure limits for trading in derivatives by Mutual Fund specified under Paragraph 12.25 of SEBI Master Circular for Mutual Funds, are as follows: 1. The cumulative gross exposure through equity, debt and derivative positions should not exceed 100% of the net assets of the scheme. 2. Mutual Funds shall not write options or purchase instruments with embedded written options except for the covered call strategy. 3. The total exposure related to option premium paid must not exceed 20% of the net assets of the scheme. 4. Cash or cash equivalents with residual maturity of less than 91 days may be treated as not creating any exposure. 5. Exposure due to hedging positions may not be included in the above mentioned limits subject to the following: • Hedging positions are the derivative positions that reduce possible losses on an existing position in securities and till the existing position remains. • Hedging positions cannot be taken for existing derivative positions. Exposure due to such positions shall have to be added and treated under limits mentioned in Point 1.

- Any derivative instrument used to hedge has the same underlying security as the existing position being hedged.
- The quantity of underlying associated with the derivative position taken for hedging purposes does not exceed the quantity of the existing position against which hedge has been taken.

6. Exposure due to derivative positions taken for hedging purposes in excess of the underlying position against which the hedging position has been taken, shall be treated under the limits mentioned in point 1 above.
7. Definition of Exposure in case of derivatives positions: Each position taken in derivatives shall have an associated exposure as defined under. Exposure is the maximum possible loss that may occur on a position. However, certain derivative positions may theoretically have unlimited possible loss. Exposure in derivative positions shall be computed as follows:

Position	Exposure
Long Future	Futures Price * Lot Size * Number of Contracts
Short Future	Futures Price * Lot Size * Number of Contracts
Option bought	Option Premium Paid * Lot Size * Number of Contracts.

Covered call strategy

The scheme may write call options only under a covered call strategy for constituent stocks of NIFTY 50 and BSE SENSEX, and any other stock as and when allowed by SEBI, subject to the following:

a) The total notional value (taking into account strike price as well as premium value) of call options written by a scheme shall not exceed 15% of the total market value of equity shares held in that scheme.

b) The total number of shares underlying the call options written shall not exceed 30% of the unencumbered shares of a particular company held in the scheme. The unencumbered shares in a scheme shall mean shares that are not part of Securities Lending and Borrowing Mechanism (SLBM), margin or any other kind of encumbrances.

c) At all points of time the Mutual Fund scheme shall comply with the provisions at paragraph (a) and (b) above. In case of any passive breach of the requirement at paragraph (a), the respective scheme shall have 7 trading days to rebalance the portfolio. During the rebalancing period, no additional call options can be written in the said scheme.

d) In case a Mutual Fund scheme needs to sell securities on which a call option is written under a covered call strategy, it must ensure compliance with paragraphs (a) and (b) above while selling the securities.

e) In no case, a scheme shall write a call option without holding the underlying equity shares. A call option can be written only on shares which are not hedged using other derivative contracts.

f) The premium received shall be within the requirements prescribed in terms of Paragraph 12.25 of SEBI Master Circular for Mutual Funds i.e. the total gross exposure related to option premium paid and received must not exceed 20% of the net assets of the scheme.

g) The exposure on account of the call option written under the covered call strategy shall not be considered as exposure in terms of Paragraph 12.25 of SEBI Master Circular for Mutual Funds.

h) The exposure on account of the call option written under the covered call strategy shall not be considered as exposure in terms of Paragraph 12.25 of SEBI Master Circular for Mutual Funds.

Benefits of using Covered Call strategy in Mutual Funds:

The covered call strategy can help in earning income and hedging risk and subsequently result in better risk adjusted returns for the Scheme. Following are the benefits offered by this strategy:

a. Hedge against market risk - Since the fund manager sells a call option on a stock already owned by the mutual fund scheme, the downside from fall in the stock price would be lower to the extent of the premium earned from the call option.

b. Generating additional returns in the form of option premium in a range bound market. Thus, a covered call strategy involves gains for unit holders in case the strategy plays out in the right direction.

Example of Covered Call

Illustrations:

Buy 100 stocks of Company A at Rs 1000 and write (sell) call options of the company A for the same month, with a strike price of Rs 1050. Assume the said option is trading at Rs 10. Thus, the total premium received for selling the call option is Rs 1000 (Rs 10*100 lot size).

On the day of expiration of options contract:

Scenario 1: markets goes up and the stock price of company A goes upto Rs 1030

a) Gain on stock is Rs 3000.

b) The call option will expire worthless (strike price is Rs 1050 and underlying price is Rs 1030). Thus, as a writer (seller) of call option, we can keep the premium of Rs 1000.

c) Thus, net gain is Rs 4000 (Rs 3000 on underlying stock and Rs 1000 premium collected)

Scenario 2: markets goes up and the stock price of company A goes upto Rs 1100

a. Gain on stock is Rs 10000

b. The call option is in the money by Rs 50 (strike price is Rs 1050 and underlying price is Rs 1100). Thus, as a writer (seller) of call option we must pay Rs 5000 to option buyer (Rs 50) and we would receive option premium of Rs. 1000 (Rs. 10*100); thus, the total loss would be Rs. 4000 (Rs. 5000 – Rs. 1000 received as the option premium).

c. Thus, net gain is Rs 6000 (Rs 10000 on underlying stock and Rs 4000 loss on option position)

Scenario 3: markets goes down and the stock price of company A goes down to Rs 950

	a) Loss on stock is Rs 5000 b) The call option will expire worthless (strike price is Rs 1050 and underlying price is Rs 950). Thus, as a writer (seller) of call option, we can keep the premium of Rs 1000. c) Thus, net loss is Rs 4000 (Rs 5000 on underlying stock and Rs 1000 premium collected) **For detailed derivative strategies, please refer to SAI.** **PORTFOLIO TURNOVER:** Portfolio Turnover is defined as the lower of the value of purchases or sales as a percentage of the average corpus of the Scheme during a specified period of time. Generally, the AMC encourages a low portfolio turnover rate. A high portfolio turnover may result in an increase in transaction, brokerage costs. However, a high portfolio turnover may also be representative of the arising trading opportunities to enhance the total return of the portfolio.
Risk Profile of the Scheme	**RISK ASSOCIATED WITH INVESTMENT IN EQUITIES:** The scheme proposes to invest in equity and equity related instruments of companies following the Technology theme. By nature, Equity instruments are volatile and prone to price fluctuations on a daily basis due to both micro and macro factors. Given that the Scheme seeks to invest in equity/equity related instruments of the Companies engaged in Technology space, the concentration is likely to be high. Further, the volatility and/or adverse performance of the concerned sectors and/or of the scrips belonging to these sectors would have a material adverse bearing on the performance of the Scheme. **The following are other risks related to investing in equities:** **Market risk:** Refers to any type of risk due to the market conditions such as volatility in the capital markets, interest rates, changes in Government policies, taxation laws etc. that may negatively affect the prices of the securities invested in by the scheme. **Business risk:** Risk related to uncertainty of income due to the nature of a company's business. Government policy regarding implementation of international treaties like WTO etc. could affect the fortunes of many of the related companies where the scheme may invest. Imposition of tariff / non - tariff barriers and restrictions on labour by countries in the target markets may impact corporate earnings. **Liquidity risk related to equity instruments:** The liquidity risk is more prominent in case of sectoral securities. However, the ability to sell these investments is limited by the overall trading volume on the stock exchanges. Securities that are unlisted carry a higher liquidity risk compared to listed securities. **Settlement Risk:** Trading volumes, settlement periods and transfer procedures may restrict the liquidity of these investments. Different segments of Indian financial markets have different settlement periods and such periods may be extended significantly by unforeseen circumstances. The inability of the Scheme to make intended securities purchases due to settlement problems could cause the Scheme to miss certain investment opportunities. **Concentration risk:** This risk arises from over exposure to few securities/issuers/sectors.

	Performance Risk: Performance of the Scheme may be impacted with changes in factors which affect the capital market. **Risk Factors associated with Thematic Schemes:** **The scheme shall seek to generate capital appreciation by investing in a diversified portfolio of technology & technology-related companies. Investing in a thematic fund is based on the premise that the Fund will seek to invest in companies belonging to specific theme. This will limit the ability of the Fund to invest in other sectors. The portfolio consisting of technology & technology-related companies may result in higher levels of volatility vis-à-vis other diversified equity-oriented schemes. Since the scheme will predominantly be invested in technology & technology-related companies it is expected to have higher market liquidity risk compared to a regular diversified equity scheme. Also, in case of equity investing, there is the risk that companies in that specific sectors will not achieve its expected earnings results, or that an unexpected change in the market (due to Government Policies or Macro Economic factors) or within the company may occur, both of which may adversely affect investment results. Thus, investing in a thematic specific fund could involve potentially greater volatility and risk.RISK ASSOCIATED WITH INVESTMENT IN DERIVATIVE INSTRUMENTS:** Derivative products are leveraged instruments and can provide disproportionate gains as well as disproportionate losses to the investor. Execution of such strategies depends upon the ability of the fund manager to identify such opportunities. Identification and execution of the strategies to be pursued by the fund manager involve uncertainty and decision of fund manager may not always be profitable. No assurance can be given that the fund manager will be able to identify or execute such strategies. The risks associated with the use of derivatives are different from or possibly greater than, the risks associated with investing directly in securities and other traditional investments. The Scheme may invest in derivative instruments. The derivatives will entail a counterparty risk to the extent of amount that can become due from the party. The cost of hedge can be higher than adverse impact of market movements. An exposure to derivatives in excess of the hedging requirements can lead to losses. An exposure to derivatives can also limit the profits from a genuine investment transaction. Efficiency of a derivatives market depends on the development of a liquid and efficient market for underlying securities and also on the suitable and acceptable benchmarks. **RISKS ASSOCIATED WITH WRITING COVERED CALL OPTIONS FOR EQUITY SHARES** In addition to the risks associated with derivative instruments, listed below are the risks associated with writing covered call options: • Market Risk: Appreciation in the underlying equity shares could lead to loss of opportunity in case of writing of covered call option. In case if the appreciation in equity share price is more than the option premium received, the appreciation in the scheme would be capped. • Liquidity Risk: This strategy of writing covered call in a scheme will be used, provided the scheme has adequate number of underlying equity shares as per regulatory requirement. Subsequently, the scheme will have to set aside a portion

	of investment in the underlying equity shares. Further, in case the covered call options are sold to the maximum extent as allowed under the purview of regulations, the scheme would be unable to sell the shares of the respective stock, to the extent that would be blocked under the covered call. Hence, if the call option contracts which have been written become illiquid, it may lead to a loss of opportunity or can cause exit issues. • As a result, it may happen that the scheme is not able to sell the underlying equity shares immediately, which can lead to temporary illiquidity of the underlying equity shares and may result in loss of opportunity. **RISK ASSOCIATED WITH INVESTMENT IN DEBT SECURITIES:** All debt securities are exposed to interest rate risks, credit risks and reinvestment risk. Different types of securities in which the scheme would invest as given in the Scheme Information Document carry different levels and types of risk. Accordingly, the scheme's risk may increase or decrease depending upon its investment pattern e.g. corporate bonds carry a higher amount of risk than government securities. Further even among corporate bonds, bond which AAA rated are comparatively less risky than bonds which are AA rated. Liquidity of scheme's investment may be inherently restricted by trading volumes and settlement periods. The inability to sell the money market or debt securities held in the scheme's portfolio due to the absence of a well developed and liquid secondary market for such securities may result, at times in losses to the scheme, in case of subsequent decline in the value of such securities. **RISK ASSOCIATED WITH INVESTMENTS IN REPO OF CORPORATE DEBT SECURITIES COUNTERPARTY RISK:** **COUNTERPARTY RISK:** The Scheme may be exposed to counter-party risk in case of repo lending transactions in the event of the counterparty failing to honor the repurchase agreement. However, in repo lending transactions, the collateral may be sold and a loss is realized only if the sale value of the collateral is less than the repo amount. The risk may be further mitigated through over-collateralization (the value of the collateral being more than the repo amount). Further, the liquidation of underlying securities in case of counterparty default would depend on liquidity of the securities and market conditions at that time. It is endeavored to mitigate the risk by following an appropriate counterparty selection process, which include their credit profile evaluation and over-collateralization to cushion the impact of market risk on sale of underlying security. **COLLATERAL RISK:** Collateral risk arises when the market value of the underlying securities is inadequate to meet the repo obligations or there is downward migration in rating of collateral. Further if the rating of collateral goes below the minimum required rating during the term of repo or collateral becomes ineligible for any reason, counterparty will be expected to substitute the collateral. In case of failure to do so, AMC will explore the option for early termination of the repo trade. **SETTLEMENT RISK:** Corporate Debt Repo (CDR) shall be settled between two counterparties in the OTC segment unlike in the case of Government securities repo transactions where CCIL

	stands as central counterparty on all transactions which neutralizes the settlement risk. However, the settlement risk pertaining to CDRs shall be mitigated through Delivery versus Payment (DvP) mechanism which is followed by all clearing members. **RISK FACTORS ASSOCIATED WITH INSTRUMENTS HAVING SPECIAL FEATURES (AT1 AND AT2 BONDS):** If the Scheme invests in debt instruments having special features, the following risks associated with debt instruments having special features will be applicable. The risk factors stated below for investment in debt instruments having special features are in addition to the risk factors associated with Fixed Income Securities/Bonds stated above: i. The Scheme may invest in certain debt instruments with special features which may be subordinated to equity and thereby such instruments may absorb losses before equity capital. The instrument may also be convertible to equity upon trigger of a pre-specified event for loss absorption. Additional Tier I bonds and Tier 2 bonds issued under Basel III framework are some instruments which may have above referred special features. The debt instruments having such special features as referred above, would be treated as debt instruments until converted to equity. ii. The instruments may be subject to features that grant the issuer a discretion in terms of writing down the principal/coupon, to skip coupon payments, to make an early recall etc. Thus debt instruments with special features are subject to "Coupon Discretion", "Loss Absorbency", "Write down on Point of Non-Viability (PONV) trigger event" and other events as more particularly described as per the term sheet of the underlying instruments. iii. The instruments are also subject to Liquidity Risk pertaining to how saleable a security is in the market. The particular security may not have a market at the time of sale due to uncertain/insufficient liquidity in the secondary market, then the scheme may have to bear an impact depending on its exposure to that particular security. **RISK ASSOCIATED WITH FLOATING RATE SECURITIES:** The fund may invest in floating rate instruments. These instruments' coupon will be reset periodically in line with the benchmark index movement. The changes in the prevailing rates of interest will affect the value of the Plan's holdings and thus the value of the Plan's Units. The fund could be exposed to the interest rate risk (i) to the extent of time gap in resetting of the benchmark rates, and (ii) to the extent the benchmark index fails to capture the interest rate movement. Though the basis (i.e. benchmark) gets readjusted on a regular basis, the spread (i.e. mark-up) over benchmark remains constant. This can result in some volatility to the holding period return of floating rate instruments. If the floating rate asset is created by swapping the fixed return to a floating rate return then there may be an additional risk of counter-party who will pay floating rate return and receive fixed rate return. Due to the evolving nature of the floating rate market, these may be an increased degree of liquidity risk in the portfolio from time to time. **RISK FACTORS ASSOCIATED WITH INVESTMENTS IN REITS AND INVITS:** **Market Risk**: REITs and InvITs are volatile and prone to price fluctuations on a daily basis owing to market movements. Investors may note that AMC/Fund Manager's investment decisions may not always be profitable, as actual market movements may

be at variance with the anticipated trends. The NAV of the Scheme is vulnerable to movements in theprices of securities invested by the scheme, due to various market related factors like changes in the general market conditions, factors and forces affecting capital market, level of interest rates, trading volumes, settlement periods and transfer procedures.

Liquidity Risk: As the liquidity of the investments made by the Scheme could, at times, be restricted by trading volumes and settlement periods, the time taken by the Mutual Fund for liquidating the investments in the schememay be high in the event of immediate redemption requirement. Investment in such securities may lead to increase in the scheme portfolio risk.

Reinvestment Risk: Investments in REITs & InvITs may carry reinvestment risk as there could be repatriation of funds by the Trusts in form of buyback of units or dividend pay-outs, etc. Consequently, the proceeds may get invested in assets providing lower returns.

The above are some of the common risks associated with investments in REITs & InvITs. There can be no assurance that a Scheme's investment objectives will be achieved, or that there will be no loss of capital. Investment results may vary substantially on a monthly, quarterly or annual basis.

RISK ASSOCIATED WITH STOCK LENDING

Risks associated with stock lending may include counter party risk, liquidity risk and other market risks. At present, there is no significant activity in the Securities Borrowing and Lending market. The Mutual Fund has so far not participated in Securities Lending market. However, we understand the risks associated with the securities lending business and the AMC will have appropriate controls (including limits) before initiating any such transactions.

Risks associated with investing in TREPS Segments

The mutual fund is a member of securities and TREPS segments of the Clearing Corporation of India (CCIL). All transactions of the mutual fund in government securities and in TREPS segments are settled centrally through the infrastructure and settlement systems provided by CCIL; thus reducing the settlement and counterparty risks considerably for transactions in the said segments. The members are required to contribute an amount as communicated by CCIL from time to time to the default fund maintained by CCIL as a part of the default waterfall (a loss mitigating measure of CCIL in case of default by any member in settling transactions routed through CCIL). The mutual fund is exposed to the extent of its contribution to the default fund of CCIL at any given point in time. In the event that the default waterfall is triggered and the contribution of the mutual fund is called upon to absorb settlement/default losses of another member by CCIL, the scheme may lose an amount equivalent to its contribution to the default fund allocated to the scheme on a pro-rata basis.

Risk mitigation strategies

Some of the risks and the corresponding risk mitigating strategies are listed below:

•**Risks associated with Equity and Equity related instruments**

Risk	Risk Mitigation Strategy
Market Risk (The risk of losses due to adverse movements in	Endeavour to have a well-diversified portfolio of good companies with the ability to use cash/derivatives for hedging.

	overall market prices.)	
	Business Risk (Risk associated to the nature of the business of the Issuer Company)	Portfolio companies carefully selected to include those with perceived good quality of earnings.
	Derivatives Risk (The risk associated with the use of derivatives due to complexity of these instruments.)	Endeavour to have a well-diversified portfolio by constructing appropriate derivative strategies and continuous monitoring of the derivatives positions and strict adherence to the regulations.
	Concentration Risk (The risk arising from a large allocation to a single asset, sector which can lead to significant losses if that concentrated area underperforms)	The Scheme shall endeavor to ensure diversification by investing across the spectrum of securities/issuers.
	Liquidity Risk (The risk that an equity asset cannot be sold quickly without significantly affecting its price)	Periodic Monitoring of portfolio liquidity.
	Performance Risk (Risk arising due to change in factors affecting the market)	Endeavour to have a well-diversified portfolio of good companies, carefully selected to include those with perceived good quality of earnings.

•**Risks associated with Debt and money market securities**

Risk	**Risk Mitigation Strategy**
Interest Rate Risk (The risk that changes in interest rates will affect the value of debt securities.)	Active duration management strategy; control portfolio duration and actively evaluate the portfolio structure with respect to existing interest rate scenario.
Market Risk/Volatility Risk	There is risk of volatility in markets due to external factors like liquidity flows, changes in the business environment,

	(Risk arising due to vulnerability to price fluctuations and volatility, having material impact on the overall returns of the scheme.)	economic policy etc. The Scheme will manage volatility risk through diversification.
	Concentration Risk (The risk of loss due to a large exposure to a single issuer, sector, or type of security.)	Diversification by investing across the spectrum of issuers or sectors.
	Liquidity Risk (The risk that a debt instrument cannot be sold quickly enough without a significant price concession.)	Periodic Monitoring of portfolio liquidity.
	Credit Risk (The risk that the issuer of a debt security will default on its payment obligations or the credit rating of the issuer gets downgraded.)	Investment universe carefully defined to include issuers with high credit quality; critical evaluation of credit profile of issuers on an on-going basis.

•**Risks associated with REITS/ INVITS:**

Risk	**Risk Mitigation Strategy**
Market Risk (Risk arising due to vulnerability to price fluctuations and volatility, having material impact on the overall returns of the scheme.)	The valuation of the REIT/InvIT units may fluctuate based on economic conditions, fluctuations in markets (eg. real estate) in which the REIT/InvIT operates and the resulting impact on the value of the portfolio of assets, regulatory changes, force majeure events etc. REITs & InvITs may have volatile cash flows. Exposure to REITs and InvITs is capped as per SEBI norms. The regulatory limits thus defined will be monitored and complied with to reduce risks inherent to these securities.
Liquidity Risk (The risk that an instrument cannot be sold quickly enough without a significant price concession.)	This refers to the ease with which REIT/InvIT units can be sold. There is no assurance that an active secondary market will develop or be maintained. Hence there would be times when trading in the units could be infrequent. The subsequent valuation of illiquid units may reflect a discount from the market price of comparable securities for which a liquid market exists. Regular monitoring of the REITs and InvITs liquidity/ trading volume & changes in market conditions/ regulatory changes will help mitigate the same.
Interest Rate Risk	Generally, there would be an inverse relationship between the interest rates and the price of units. Regular monitoring and

	(The risk that changes in interest rates will affect the value of the securities.)	evaluating the portfolio structure with respect to changing interest rate scenario.
Plans/Options	The Scheme has the following two plans: 1. **Regular Plan** is for investors who wish to route their investment through any distributor 2. **Direct Plan** is only for investors who purchase /subscribe Units in a Scheme directly with the Mutual Fund or through Registered Investment Advisor (RIA) and is not available for investors who route their investments through a Distributor The Regular and Direct plan will have a common portfolio. The Scheme has the following Options: 1. **Growth Option** 2. **Income Distribution cum Capital Withdrawal (IDCW) Option** **IDCW Sub Options are:** 1. Reinvestment of Income Distribution cum Capital Withdrawal Option. 2. Payout of Income Distribution cum Capital Withdrawal Option **Default Option/ Sub option - Growth Option** (In case Growth Option or IDCW Option/ Sub option is not indicated) **Amounts under IDCW option can be distributed out of investors capital (equalization reserve), which is part of sale price that represents realized gains. However, investors are requested to note that amount of distribution under IDCW option is not guaranteed and subject to availability of distributable surplus.* **For detailed disclosure on default plans and options, kindly refer SAI.**	
Applicable NAV (after the scheme opens for subscriptions and redemptions)	**i. APPLICABLE NAV FOR SUBSCRIPTIONS/ PURCHASE INCLUDING SWITCH-IN OF UNITS** • In respect of valid applications received upto 3.00 p.m. and where the funds for the entire amount are available for utilization before the cut-off time i.e. credited to the bank account of the Scheme before the cut-off time - the closing NAV of the Business day shall be applicable. • In respect of valid applications received after 3.00 p.m. and where the funds for the entire amount are credited to the bank account of the Scheme either on the same day or before the cut-off time of the next Business Day i.e. available for utilization before the cut-off time of the next Business Day -the closing NAV of the next Business Day shall be applicable. • Irrespective of the time of receipt of application, where the funds for the entire amount are credited to the bank account of the Scheme before the cut-off time on any subsequent Business Day i.e. available for utilization before the cut-off time on any subsequent Business Day - the closing NAV of such subsequent Business Day shall be applicable.	

	For determining the applicable NAV for allotment of units in respect of purchase / switch-in in the Scheme, it shall be ensured that: • Application is received before the applicable cut-off time (i.e. 3.00 pm). • Funds for the entire amount of subscription/purchase as per the application are credited to the bank account of the Scheme before the cut-off time (i.e. 3.00 pm). • The funds are available for utilization before the cut-off time (i.e. 3.00 pm) without availing any credit facility whether intra-day or otherwise, by the respective scheme. **ii. APPLICABLE NAV FOR REDEMPTIONS INCLUDING SWITCH-OUTS** • In respect of valid applications received up to 3.00 p.m., the closing NAV of the day on which the application is received; • In respect of valid applications received after 3.00 p.m., the closing NAV of the next business day. The aforesaid provisions shall also be applicable to systematic transactions like Systematic Investment Plan, Systematic Transfer Plan, etc. The above-mentioned cut-off timing shall also be applicable to transactions through the online trading platform.

Dividend Policy	Under the Income Distribution cum capital (IDCW) withdrawal option, the Trustee will have the discretion to declare the Income Distribution cum capital withdrawal as per the specified frequencies, subject to availability of distributable surplus calculated in accordance with the Regulations. The actual declaration of Income Distribution cum capital withdrawal and frequency will inter-alia, depend on availability of distributable surplus calculated in accordance with SEBI (MF) Regulations and the decisions of the Trustee shall be final in this regard. There is no assurance or guarantee to the Unit holder as to the rate of Income Distribution cum capital withdrawal nor that the Income Distribution cum capital withdrawal will be paid regularly. The amounts can be distributed out of investor's capital (Equalization Reserve), which is a part of sale price of the units that represents realized gains. The AMC/Trustee reserves the right to change the frequency of declaration of Income Distribution cum capital withdrawal or may provide for additional frequency for declaration of Income Distribution cum capital withdrawal. **Income Distribution cum capital withdrawal (IDCW) Procedure** In accordance with Paragraph 11.6.1 of SEBI Master Circular for Mutual Funds, the procedure for Income Distribution cum Capital Withdrawal would be as under: 1. The Trustees shall decide the quantum of IDCW and the record date in their meeting. IDCW so decided, shall be paid, subject to availability of distributable surplus. 2. Within one calendar day of the decision by the trustees, AMC shall issue notice to the public communicating the decision including the record date. The record date shall be two working days from the date of publication in at least one English newspaper or in a newspaper published in the language of the region where the Head Office of the mutual fund is situated, whichever is issued earlier. 3. Record date shall be the date which will be considered for the purpose of determining the eligibility of investors whose names appear on the register of unit holders for receiving dividends. The NAV shall be adjusted to the extent of dividend distribution and statutory levy, if applicable, at the close of business hours on record date. 4. The notice will, in font size 10, bold, categorically state that pursuant to payment of IDCW, the NAV of the Scheme would fall to the extent of payout and statutory levy (if applicable). 5. Before the issue of such notice, no communication indicating the probable date of Income Distribution cum capital withdrawal declaration in any manner whatsoever will be issued by Mutual Fund. Amounts under IDCW option can be distributed out of investors capital (equalization reserve), which is part of sale price that represents realized gains. However, investors are requested to note that amount of distribution under IDCW option is not guaranteed and subject to availability of distributable surplus.
Name of the Fund Manager	Mr. Karan Doshi Mr. Jaiprakash Toshniwal (Tenure for which the Fund Manager has been managing the Scheme: Not applicable as it is a New Scheme)
Name of the Trustee Company	LIC Mutual Fund Trustee Private Limited
Performance of the scheme:	The Scheme is a new scheme and hence the same is not applicable.

[In case of a new scheme, the statement should be given "This scheme does not have any performance track record"]	
Additional Scheme Related Disclosures	1. Scheme's portfolio holdings: The Scheme is a new scheme and hence the same is not applicable. 2. Disclosure of name and exposure to Top 7 issuers, stocks, groups and sectors as a percentage of NAV of the scheme in case of debt and equity ETFs/index funds - Not applicable as LIC MF Technology Fund would be an active Scheme. 3. Portfolio Turnover Rate: The Scheme is a new scheme and hence the same is not applicable.
Expenses of the Scheme **Recurring expenses**	**New Fund Offer (NFO) period** These expenses are incurred for the purpose of various activities related to the NFO like sales and distribution fees paid, marketing and advertising, registrar expenses, printing and stationery, bank charges etc. The entire NFO expenses will be borne by the AMC. **Continuous Offer** The recurring expenses of the Scheme (including the Investment Management and Advisory Fees) shall be as per the maximum permissible limits prescribed under the SEBI (Mutual Funds) Regulations. These are as follows:

Slab Rates

Daily Net Assets	As a % of daily net assets per annum
On the first Rs. 500 crore	2.25%
On the next Rs. 250 crore	2.00%
On the next Rs. 1,250 crore	1.75%
On the next Rs. 3,000 crore	1.60%
On the next Rs. 5,000 crore	1.50%
On the next Rs. 40,000 crores	Reduction of 0.05% for every increase of Rs. 5,000 crores of daily net assets or part thereof
Balance of assets over and above Rs. 50,000 crores	1.05%

The total expenses of the Scheme(s) including the investment management and advisory fee shall not exceed the limit stated in Regulation 52(6) of the SEBI (Mutual Funds) Regulations.

Expense Structure for Direct Plan - The annual recurring expenses will be within the limits specified under the SEBI (Mutual Funds) Regulations, 1996. Direct Plan under the aforementioned Scheme shall have a lower expense ratio excluding distribution expenses, commission, etc. and no commission for distribution of Units will be paid / charged under the Direct Plan.

The fund shall update the current expense ratios on the website (www.licmf.com) at least three working days prior to the effective date of the change. The exact web link for TER is https://www.licmf.com/downloads/total-expense-ratio.

Actual expenses for the previous financial year: The Scheme is a new scheme and hence the same is not applicable.

	The maximum limit of recurring expenses that can be charged to the Scheme would be as per Regulation 52 of the SEBI (MF) Regulation, 1996. Investors are requested to read "Section- Annual Scheme Recurring Expenses" in the SID.	
Load Structure	Exit Load: 1. If units of the Scheme are redeemed / switched-out within 90 days from the date of allotment: a. Upto 12% of the units: No exit load will be levied b. Above 12% of the units: exit load of 1% will be levied 2. If units of the Scheme are redeemed / switched-out after 90 days from the date of allotment: No exit load will be levied. Load shall be applicable for switches between eligible Schemes of LIC Mutual Fund as per the respective prevailing load structure, however, no load shall be charged for switches between plans/options within the Schemes of LIC Mutual Fund. Pursuant to Paragraph 10.6 of SEBI Master Circular for Mutual Funds, no exit load shall be charged in respect of units allotted on reinvestment of Income Distribution cum Capital Withdrawal. In accordance with Paragraph 10.3.4 of SEBI Master Circular for Mutual Funds, the exit load, if any, charged by the Scheme shall be credited back to the Scheme after debiting applicable Goods and Service Tax, if any. The Trustees shall have a right to modify the exit load structure with prospective effect subject to a maximum prescribed under the Regulations.	
Tax treatment for the Investors (Unitholders)	Investor will be advised to refer to the details in the Statement of Additional Information and also independently refer to his tax advisor.	
Daily Net Asset Value (NAV) Publication	The AMC will calculate and disclose the first NAV(s) of the Scheme not later than 5 (five) Business days from the date of allotment. Thereafter, the AMC shall update the NAV of the Scheme on the website of LIC Mutual Fund (www.licmf.com) and on the website of Association of Mutual Funds in India (AMFI) (www.amfiindia.com) by 11.00 p.m. on every Business Day. For details, please refer the Scheme Information Document.	
For Investor Grievances please contact	Name and Address of Registrar	KFin Technologies Limited Selenium Tower B, Plot number 31 & 32, Financial District, Nanakramguda, Serilingampally Mandal, Hyderabad – 500032 www.kfintech.com Email ID: service_licmf@kfintech.com
Unitholders' Information	**Accounts Statements:** • The AMC shall send an allotment confirmation specifying the units allotted by way of email and/or SMS within 5 working days from the date of closure of NFO period to the Unit holders registered e-mail address and/ or mobile number (whether units are held in demat mode or in account statement form). • On an ongoing basis, an allotment confirmation specifying the number of units allotted by way of e-mail and/or SMS within 5 business days from the date of receipt of transaction request/allotment will be sent to the Unit Holders registered e-mail address and/or mobile number. • In case of Unit Holders holding units in the dematerialized mode, the Fund will not send the account statement to the Unit Holders. The statement provided by the Depository Participant will be equivalent to the account statement. • For those unit holders who have provided an e-mail address, the AMC will send the account statement by e-mail. Unit holders will be required to	

	download and print the documents after receiving e-mail from the Mutual Fund. Should the Unit holder experience any difficulty in accessing the electronically delivered documents, the Unit holder shall promptly advise the Mutual Fund to enable the Mutual Fund to make the delivery through alternate means. It is deemed that the Unit holder is aware of all security risks including possible third party interception of the documents and contents of the documents becoming known to third parties. • The Unit holder may request for a physical account statement by writing/calling the AMC/ISC/RTA. In case of specific request received from the Unit Holders, the AMC/Fund will provide the Account Statement to the Investors within 5 business days from the receipt of such request. **Annual Financial results** The Scheme wise annual report or an abridged summary thereof shall be provided to all Unit holders not later than four months (or such other period as may be specified by SEBI from time to time) from the date of closure of the relevant accounting year (i.e., 31st March each year). Scheme wise annual report shall be displayed on the website of the AMC (www.licmf.com) and Association of Mutual Funds in India (www.amfiindia.com). In case of unitholders whose email addresses are available with the Mutual Fund, the scheme annual reports or abridged summary would be sent only by email. The unitholders whose e-mail addresses are not registered with the Fund are requested to update / provide their email address to the Fund for updating the database. Physical copy of scheme wise annual report or abridged summary shall be provided to investors who have opted to receive the same. The full annual report shall be available for inspection at the Head Office of the Mutual Fund and a copy shall be made available to the Unit holders on request on payment of nominal fees, if any. The AMC shall publish an advertisement every year, in all India edition of at least two daily newspapers, one each in English and Hindi, disclosing the hosting of the scheme wise annual report on the AMC website (www.licmf.com) and on the website of AMFI (www.amfiindia.com). **Half yearly portfolio** The Mutual Fund/AMC will disclose portfolio of the Scheme (along with ISIN) as on the last day of the half year for all their schemes in the format prescribed by SEBI on its website and on the website of AMFI within 10 days from the close of each half year respectively in a user-friendly and downloadable spreadsheet format. In case of Unitholders whose e-mail addresses are registered, the Mutual Funds/ AMC shall send via email the half-yearly statement of scheme portfolio within 10 days from the close of each half-year respectively. Mutual Fund/ AMC shall publish an advertisement every half-year disclosing the hosting of the half-yearly statement of its Schemes portfolio on their respective website and on the website of AMFI. Such advertisement shall be published in all India edition of at least two daily newspapers, one each in English and Hindi. Mutual Funds/AMCs shall provide a physical copy of the statement of it scheme portfolio without charging any cost, on specific request received from a Unitholder.
